

Jesper Stoltz

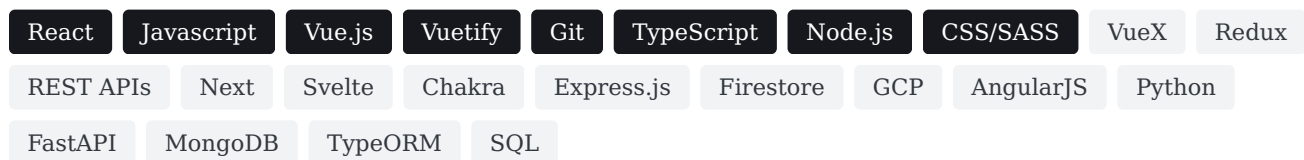

"Let's craft the solution — we'll high five with each impact we make."

Summary

As a consultant, I focus on understanding real needs and turning them into scalable, user-centered solutions. Drawing on seven years of experience managing retail teams and operations, I bring a strong sense of business awareness and customer understanding to my technical work. I've helped clients by building tools such as AI-driven resource management systems, office booking platforms, and complex order management solutions. Working across the full stack — from React and Vue frontends to robust backends in Node.js and TypeORM — I collaborate closely and smoothly with product and UX teams to deliver solutions that are performant, accessible, and designed to empower clients by truly solving their challenges.

Skills

Experience

Senior Fullstack Developer · Ingka Group (IKEA)

February 2026 - Current

I'm currently working with Ingka's Edge Team, focusing on full-stack innovation and exploration. The team is recognized as a go-to resource for cross functional collaboration, specializing in delivering rapid prototypes and turning ideas into fast realities, on both smaller and larger scales. Currently working with the main focus on developing a solution that heavily improves on the logistics end of delivering instructions and consumer information.

Senior Fullstack Developer · Microniq Business Automation AB

May 2025 - January 2026

I was part of a team developing a resource planning platform that helps cleaning companies streamline daily operations and improve planning efficiency. The frontend, built with React and Material UI, offered a clean and intuitive experience, while the backend, powered by PostgreSQL, Express.js, and TypeORM, ensured reliability and scalability. We integrated with the Fortnox API for automated financial syncing and used WebSockets for real-time updates, reducing manual work and saving clients valuable time. I was also involved in Geo - and AI-related development initiatives within the platform.

Fullstack Developer · Ingka Group (IKEA)

April 2023 - April 2025

At IKEA, I collaborated with engineers and managers to develop and maintain three internal booking and resource management applications used across multiple countries. I worked across the full stack, from frontend to backend and cloud, to implement new features, improve performance, and enable multilingual support in both interfaces and user communications (emails, notifications).

Frontend Developer · J2Sourcing

December 2022 - February 2023

At J2Sourcing, I led the frontend development to modernize their legacy sales system, transitioning it into a browser-based web platform. I collaborated closely with the backend developer to plan the architecture and design efficient data structures that made the new system powerful, maintainable, and scalable for future growth.

Team Manager · GESHDO

September 2021 - January 2024

As a Team Manager, I led a cross-functional team of Software Developers, a Scrum Master, and a UX Engineer. My focus was on fostering collaboration, knowledge sharing, and motivation to drive continuous improvement. I worked to create an environment that supported both professional and personal growth, helping the team remain adaptable, solution-oriented, and strong in their roles.

Tech lead, Frontend Developer · IKEA

September 2020 - November 2022

As Tech Lead and Frontend Developer, I collaborated with engineers and managers to enhance and extend two internal systems for office space and resource management, particularly during the challenges of the Covid-19 pandemic. I contributed to new features, sprint planning, and task prioritization in alignment with the product owner, ensuring the team worked efficiently toward shared goals as the applications scaled globally.

IT Consultant · GESHDO

September 2020 - Current

GESHDO specializes in dynamic IT consulting, driven by a commitment to tailored solutions. We prioritize rapid delivery to align with your goals while managing costs effectively. Our expertise spans all the major cloud platforms like AWS, Azure, and Google Cloud. Back-end development, with diverse languages and frameworks, equips us to solve complex challenges. Our frontend consultants blend design finesse with technical precision to create seamless, visually appealing interfaces. GESHDO pushes boundaries to provide optimal, adaptable solutions for your organization.

Frontend Developer · Procommerca

March 2020 - May 2020

During my second internship, I developed data migration systems that streamed data between databases via an internal API. Adapting to the early stages of the Covid-19 pandemic, I built automated functions that gathered and analyzed client statistics to provide better business insights. I also created an internal weather dashboard integrating external API data for historical and forecast visualization.

JavaScript TypeScript AngularJS Bootstrap 3 NodeJS ExpressJS MongoDB

Frontend Developer · Procommerca

September 2019 - December 2019

At my first internship, I developed an automated invoice system integrating the company's internal system with its billing provider's API. I also built a client invitation system with customizable templates for email and SMS delivery, and an internal dashboard that provided real-time updates for both the company and its clients.

Education

Frontend Developer

EC Utbildning · 2018 - 2020

Program focused on teaching frontend development with an emphasis on building high-quality web applications using industry-standard technologies. Acquired proficiency in modern frontend technologies, including HTML, CSS, JavaScript, and React, through coursework and internships. Gained valuable soft skills such as effective communication and agile development methodologies.
